Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Mr. Haendler proposed indicating in claim 19 that both the first and second layers were continuous. The Examiner concurred that this would overcome the rejection and likely make the claim and claim 20 allowable. Regarding claims 104-107, Mr. Haendler noted that the Mason reference does not show an actuator that is operable to be actuated by a drive circuit, but only operable to be used as a generator. The Examiner concurred and indicated that claims 104-107 were most likely allowable .
